

# MAINPORT TRAINING AND INSPECTION (MOZAMBIQUE) LDA

- Equipment Integrity
- Personnel Competence
- Industrial Support Services

The Company was registered in Mozambique in 2014 and forms part of the Mainport Group, established in the UK in 1992. We have spent the last 26 years working in various industry sectors providing high quality Training and Inspection Services. We work closely with our clients to help them comply with standards, develop their personnel and run their operations safely and efficiently. Our Mozambique Base is in Pemba, with a further base in the process of being added in Palma to support the forthcoming LNG and other projects.

## LEGISLATION AND STANDARDS

Our objective is to help our clients meet the requirements of legislation, international standards or specific project requirements. We work under and alongside numerous accrediting and approvals bodies. We can also develop clients' own policies and procedures to enhance safety, efficiency and traceability. Our wrap around maintenance and manpower support services are delivered on time and to standard.

## LOCAL CONTENT

We place a high priority on maximising localisation within our company. We develop local nationals as Trainers and Inspectors via an in-house program resulting in international qualifications. We are open to collaboration with incoming organisations seeking a local partner who can take them further, faster. We are a well established and well connected Company.

## TRAINING SERVICES

Our focus areas are lifting operations, mobile plant operation, vehicle driving, high risk industrial safety and more general Health and Safety training. Our multilingual Trainers and Assessors have a wealth of experience to share with their learners. As well as industry standard training courses we develop competence measuring systems and training programs customised to meet clients' specific organisational requirements.

## INSPECTION SERVICES

Our technicians conduct inspections of all kinds of industrial equipment and structures using a range of Non Destructive Testing (NDT) methods. We operate in accordance with international standards with a client -accessible database of inspection records. Mainport is proud to be the first Mozambican company to achieve Full Member Status with the Lifting Equipment Engineers Association (LEEA).

We conduct Inspection and Load Testing of Lifting Equipment and NDT inspection of OCTG downhole tools and well casings. Our inspectors are qualified up to Level 2 and Level 3.

## MANPOWER SERVICES

Mainport can supply skilled and unskilled workers on a temporary or permanent basis 'ready-trained'. Drivers of Light Vehicles and Heavy Trucks, Forklift Operators, Riggers, Lift Planners, Crane Operators and General Assistants are available at short notice. We can also develop selection processes for companies who are getting established and need to recruit.

## INDUSTRIAL SERVICES

Our mobile maintenance team can deal with repairs and equipment refurbishment. Whether the requirement is for tank cleaning, sand blasting, painting or welding we can provide a solution. We also supply high quality equipment for purchase or hire such as lifting equipment, confined space entry kits and working at height PPE.

## CONSULTANCY

Where specialist advice is needed we can fill the gap. Our consultants can advise on Health and Safety, Lifting Operations, Confined Space Entry, Working at Height and Environmental matters. Where we cannot provide from our local capacity we can call on our global network of specialist consultants.
